

## THE REQUIREMENTS OF THE 16 -19 STUDY PROGRAMME

How do we meet the requirements of the 16 – 19 study programme?

All ESFA funded education for 16 to 19-year olds should be delivered as a study programme which combines qualifications and other activities, and which is tailored to each student's prior attainment and career goals.

Every study programme must have a core aim. For the majority of students, this will be either the study of substantial technical, applied or academic qualification(s) or preparation for employment.

The Corsham6th programme consists of a Level 3 programme. The Level 3 programme is composed a wide variety of academic qualifications and also a range of applied courses.

Students who do **not** hold a GCSE grade 4 in maths and/or English are required to continue these subjects as part of their study programme. Students are provided with time on their timetables to study and retake these subjects. We have also been fortunate enough to use additional funding to further support these student with small group tuition.

All study programmes should include work experience and non-qualification activities which complement the other elements of the programme and support the student to progress to further or higher education or to employment. The non-qualification activity should develop students' character, skills, attitudes and confidence. This is done as part of our Tutor programme, Core Lessons and Enrichment sessions.

We also encourage ALL students to complete an Extended Project Qualification (EPQ) as the skills developed linked to independent learning, research skills, time management and public speaking are invaluable going forward. This combined with the positive impact on many university offers make this a qualification that we are passionate in promoting.
